

Racial and Ethnic Diversity

DEFINITION

Racial and ethnic diversity is the number of children under age 18 by racial and ethnic categories as defined by the 2000 U.S. Census. For children living in households, racial and ethnic categories are chosen by the head of household or person completing the census form.

SIGNIFICANCE

Racial and ethnic diversity increased in the United States over the last several decades and is projected to rise in the future.¹ Minority children (all those except White, non-Hispanic children) accounted for 98% of the growth in the U.S. child population during the 1990s.² In 2000, 61% of all U.S. children were White non-Hispanic.³ According to Census Bureau projections, by 2023 fewer than half of all children in the United States will be White, non-Hispanic.⁴

In 2000, 73% of children in Rhode Island were White, non-Hispanic, down from 84% in 1990. The number of minority children nearly doubled from 36,867 in 1990 to 67,747 in 2000. The number of White non-Hispanic children dropped by 8,748 during the same period.^{5,6}

In 2007 in Rhode Island, 74% of children under age 18 were White, 8% were Black or African American, 4% were Asian, 11% of children were identified as Some Other Race, and 4%

as Two or More Races. Race was unknown for less than 1% of children in Rhode Island. In 2007, 18% of children living in Rhode Island were Hispanic.⁷

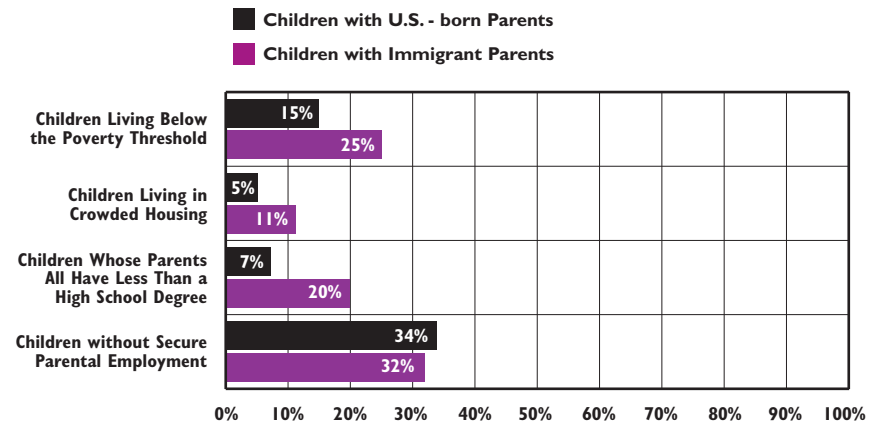

Minority children are highly concentrated in the six core cities in Rhode Island. Core cities are defined as those cities in which 15% or more of the children live in poverty. More than half (58%) of children living in the core cities are minority children. More than three-quarters (78%) of all minority children in Rhode Island live in these six communities.⁸

In 2007, there were 9,620 foreign-born children under age 18 living in Rhode Island, 31% of whom were naturalized U.S. citizens.⁹ Of Rhode Island's immigrant children, 24% were born in Central or South America, 19% were born in Asia, 17% were born in the Caribbean, 14% were born in Africa, 13% were born in Europe, and 10% were born in North America (Canada, Bermuda or Mexico).¹⁰

In 2007, 22% of children between the ages of five and 17 living in Rhode Island spoke a language other than English at home. Of these children, 92% spoke English well or very well.¹¹

Diversity presents both opportunities and challenges to schools, child care centers, health care providers, social service agencies and other community service providers, in terms of adapting current practices to meet the needs of a changing population.¹²

Characteristics of Children Living in Families with U.S.-born and Immigrant Parents, Rhode Island, 2007

Source: Population Reference Bureau analysis of data from the 2007 American Community Survey.

- ◆ Twenty-six percent of children in Rhode Island live in immigrant families (either they are foreign-born or they have at least one parent who is foreign-born).¹³ Most immigrant families in Rhode Island are not new arrivals to the United States; 3% of parents in Rhode Island immigrant families arrived in this country fewer than five years ago.¹⁴ Eighty-seven percent of children in immigrant families in Rhode Island were born in the United States.¹⁵
- ◆ Fifteen percent of children in Rhode Island with U.S.-born parents are poor, compared with 25% of children with immigrant parents. Almost two-thirds (62%) of Rhode Island's poor children live in families with U.S.-born parents.¹⁶
- ◆ In the U.S., higher rates of poverty among immigrant families are mainly due to lower labor force participation among immigrant women than native-born women and to the low wages received by many immigrants. Many immigrant parents earn low wages because of low levels of educational attainment and limited English proficiency.¹⁷ Twenty-five percent of children in immigrant families in Rhode Island live in linguistically-isolated households.¹⁸

Source of Data for Table/Methodology

U.S. Census Bureau, Census 2000 Redistricting File. All categories are mutually exclusive. If Hispanic was selected as ethnicity, individuals are not included in other racial categories. Likewise, if more than one race was selected, individuals are included in two or more races and not in their individual race categories.

The core cities are Central Falls, Newport, Pawtucket, Providence, West Warwick and Woonsocket.
