

Adoption and Permanency

DEFINITION

Adoption and permanency is the percentage of children in out-of-home care who transition to a permanent placement through adoption, reunification or guardianship. Data are for all children who were in out-of-home placement during federal fiscal year 2002.

SIGNIFICANCE

The uncertainty of multiple, prolonged or unstable out-of-home placements has negative effects on children's emotional well-being, identity formation, and sense of belonging, impacting behavior, academic achievement and long term self-sufficiency.^{1,2} Youth who age out of care without finding a permanent placement or who spend significant parts of their adolescence in foster care suffer disproportionately from poverty, unemployment, academic failure, incarceration and premature parenting.³

One of the goals of the federal Adoption and Safe Families Act of 1997 (ASFA) is to ensure that children exit out-of-home placement to permanent placement, i.e. reunification, adoption or guardianship, as quickly as possible without jeopardizing the child's safety. Effectiveness in achieving permanency must include the interrelated measures

of how quickly permanency is achieved, the proportion of children for whom it is achieved, and the lasting success of the permanent placements.⁴ In addition, increasing attention is being paid to the long-term personal, social, academic and economic outcomes achieved for children who leave the child welfare system.^{5,6,7}

National experience indicates that particular attention must be paid to populations of children for whom permanency may be more difficult to achieve. This includes older children, children with disabilities and minority children.^{8,9,10} Planning for permanency requires a mix of family-centered and legal strategies designed to ensure that children and youth have safe, caring, stable and lifelong families in which to grow up.¹¹

Percentage of Children in Out-of-Home Care Exiting Care to a Permanent Placement, Rhode Island, FY 2002*

	All Exits	With Disability	Over Age 12 at Entry
Adoption	14%	10%	<1%
Guardianship	2%	1%	2%
Reunification	70%	66%	73%
Other	13%	22%	23%
Missing	1%	1%	2%
Total Number	1,378	232	662

◆ In FY 2002 there were 3,742 children in out-of-home placement. Of these, 1,378 children exited care. Of the children who exited care, 86% exited to a permanent placement such as adoption, guardianship or reunification. Children exiting to a permanent placement account for 32% of all children in out-of-home placement.¹²

Children Aging Out of Foster Care*

◆ Children who do not exit care promptly may eventually age out, never having found a permanent placement. In FY 2002, 62 Rhode Island children exited out-of-home placement to emancipation. Of these, 82% were older than age 12 at entry into care.¹³

◆ Youth who age out of foster care experience high rates of poverty, homelessness, unemployment, incarceration and poor health. Youth who receive more training and services, have real work experience and have positive support systems prior to exiting foster care experience better outcomes after exiting foster care. Research indicates that specialized mental health services and transition systems that extend beyond the age of discharge are crucial for the success of these youth.¹⁴

*Foster care refers to all out-of-home placements, consistent with language used in federal reports. *Throughout this indicator, fiscal year refers to federal fiscal year, Oct. 1-Sept. 30. Permanent placement indicates adoption, reunification or guardianship.

Length of Time to Adoption or Reunification, Rhode Island, FY 1998-2002

	Adoption		Reunification	
	1998	2002	1998	2002
Less than 24 months	28%	45%	75%	84%
More than 24 months	63%	53%	6%	14%
Missing data	9%	2%	19%	3%

- ◆ The percentage of children in the Rhode Island child welfare system who were adopted in less than 24 months increased from 28% in FY 1998 to 45% in FY 2002.
- ◆ The percentage of children who were reunified with their family of origin in less than 24 months increased from 75% in FY 1998 to 84% of children in FY 2002.

Children Re-Entering Foster Care after Prior Episode, FY 1998-2002

- ◆ Success in reducing the duration in temporary placement must be measured in conjunction with rates of re-entry into the system (i.e., the failure rate of the permanent placement). In FY 2002, 31% of children in Rhode Island who entered out-of-home placement were re-entering after a prior episode, up from 27% in 1998.¹⁵
- ◆ The majority of child maltreatment cases involve neglect. The greatest contributors to neglect are poverty, parental substance abuse and/or mental illness. Achieving timely and successful reunification requires access to substance abuse and mental health treatment.
- ◆ Parents striving for reunification with their children may also require in-home services, parenting skills training, assistance in meeting basic needs (food, housing, income), child care, and specific strategies to decrease isolation and strengthen community supports.¹⁶

Adoptions of Children in DCYF Care, 2003

- ◆ In calendar year 2003, 256 children in the care of DCYF were adopted in Rhode Island. Of these children, 52% were White, 17% were Black, 16% were Hispanic and 15% were other racial/ethnic groups or unknown.
- ◆ Of the children adopted, 59% were under age 6, 24% were between age 6 and 11 and 17% were age 12 or older. As of December 31, 2003, 210 children in the care of DCYF were awaiting adoption. Of these children, 44% were White, 29% were Black, 22% were Hispanic and 6% were other racial/ethnic groups or unknown race or ethnicity.
