Opportunity Youth in Rhode Island: Recommendations and Resources for Reconnection

Opportunity youth are youth and young adults between the ages of 16 and 24 who find themselves disconnected from school or work. According to national estimates, there are nearly five million opportunity youth in the U.S., just over 12% of youth and young adults. After a decade of success through targeted efforts to reduce youth disconnection, the COVID-19 pandemic turned back significant progress in school enrollment and unemployment, leaving the largest number of opportunity youth since the Great Recession.1,2

Research shows that school and work help youth and young adults acquire the skills, knowledge, experience, and supports they need to become productive adults. Youth who do not continue their high school education, move on to postsecondary education, or become a part of the workforce are at risk of experiencing long-term negative outcomes as they transition from adolescence to adulthood.3 Opportunity youth can become disengaged from school and work for a variety of reasons, including physical and mental health conditions, child welfare or juvenile justice involvement, lack of access to health care, unstable housing, family responsibilities, and lack of affordable or reliable transportation.4,5,6 There is both an individual and societal cost to youth disconnection. The disconnection of youth ages 16 to 24 results in over $93 billion in lost earnings, tax revenues, and government spending annually and over $1.6 trillion over their lifetimes.7,8

The period of emerging adulthood presents an opportunity window to engage young people in creative ways that tap into their potential, engage their independence, help them explore where their passions and skills intersect, and provide a foundation for their career pathway and trajectory. It is important to view this group through a lens of opportunity, possibility, and progress rather through a deficit lens.9 Reframing “disconnected youth” as “opportunity youth” shifts the responsibility back to the community to create engagement pathways for connection and to address the factors that contribute to disconnection, including many barriers that are systemic and will require comprehensive reform.10

The Importance of Centering Youth Voice

Rhode Island KIDS COUNT is committed to amplifying the voices of youth with lived experience so they can lead on policies that directly impact their lives and futures. The topics and recommendations raised in this Issue Brief were informed in part by a focus group with youth ages 16 to 24 who have lived experience in Rhode Island’s child welfare system and who are actively seeking education, work, and the opportunity to inform policies for their peers and the youth who may enter the system after them.
Rhode Island's Opportunity Youth

- Between 2017 and 2021, 2,728 (4.3%) youth ages 16 to 19 in Rhode Island were not in school and not working. Among these youth, 60% were male and 40% were female. Sixty-nine percent of these youth were high school graduates, and 31% had not graduated from high school. In 2021, Rhode Island had the lowest percentage of teens who were not in school or working in the nation. 11

- In 2021, 8.1% (11,500) of youth ages 16 to 24 in Rhode Island were not in school and not working. The rate was 8.3% for males and 7.9% for females. Rhode Island had one of the lowest rates of youth ages 16 to 24 not in school and not working. 12 However, rates varied by county. From 2016-2020, 9.7% of youth in Providence County, 8.9% in Kent County, and 4.9% in Washington County were disconnected. 13

- Opportunity youth are disproportionately People of Color and face institutional racism as an entrenched barrier to success. 14
- In 2020 among U.S. youth ages 16 to 24, rates of disconnection were the highest among Native American and Black youth. One in four Native American young men were not in school and not working, the highest rate of disconnection in the U.S. 15
- When Asian youth are disaggregated by subgroup, we see disparities in rates of disconnection with the highest rates among Cambodian (13%) and Hmong (15%) youth. 16
- Young men were more likely than young women to experience disconnection, with the highest rates among Native American and Black men. 17

Racial and Ethnic Disparities

- In 2020 among U.S. youth ages 16 to 24, rates of disconnection were the highest among Native American and Black youth. One in four Native American young men were not in school and not working, the highest rate of disconnection in the U.S. 15

Source: National Equity Atlas, Disconnected Youth, nationalequityatlas.org
Youth who age out of foster care are at risk for low educational attainment, homelessness, and unemployment. Among the Class of 2022, 83% of Rhode Island students graduated high school in four years, compared to 52% of students in foster care. Less than 1% of youth in foster care in Rhode Island obtain a college degree. Nearly 50% of foster youth who drop out of college do so because they cannot afford to continue. To combat this financial barrier, 37 states have tuition waiver programs for students who experienced foster care. Rhode Island currently has a Higher Education Incentive fund but does not have a tuition waiver program.

In 2018, Rhode Island established the Voluntary Extension of Care (VEC) program, allowing youth in foster care ages 18 to 21 the option of continuing to receive services. VEC helps youth in care transition to adulthood by supporting them in making decisions about housing, education, employment, and health and social services. Youth must meet education or employment requirements. VEC works with the Governor's Workforce Board to connect young adults to a career pathway. In 2023, VEC began collaborating with the Community College of Rhode Island to provide an opportunity for youth to participate in CNA training with a path to employment.

On November 30, 2022, 97 youth ages 18 to 21 were enrolled in VEC with approved court petitions.

The Rhode Island Department of Children, Youth & Families (DCYF) operates the Rhode Island Training School, a secure facility for adjudicated youth and youth awaiting trial. In 2022, the average age of youth at the Training School was 16, however, students’ math and reading skills were on average at a fourth-grade level at entry. Average grade levels for math and reading increased by about one year by release.

During the 2021-2022 school year, 14 youth at the Training School either graduated with a high school diploma or earned a GED. Four youth received postsecondary education services, 11 youth completed driver's education certification, landscape design, and/or barbering training, and 69 youth completed a culinary program.

Making the transition from learning in secure detention back into a local school district is often difficult. In 2022, the Rhode Island Department of Education (RIDE) revised their enrollment protocols so that youth who are in secure detention remain enrolled in their local school district.

Mentoring programs, case managers who help youth navigate resources, transitional jobs, and paid internships help youth form connections before and during reentry that provide the best outcomes for success.
Multilingual Learners and Immigrant Youth

- Across the U.S., the population of Multilingual Learners (MLLs), are the fastest growing group of students. The number of MLL students in Rhode Island has nearly doubled (increased by 88%) from the 2011-2012 to 2021-2022 school years. These students may be working multiple jobs or working third shifts while also going to school full-time, living with distant relatives or alone, or lacking basic needs. Nationally, nearly one in five (18%) MLL youth ages 16 to 24 are disconnected from school or work compared to 12% of youth with English language fluency.

- The key to engagement among MLL students is through an asset-based approach that supports their linguistic capabilities, celebrates the rich culture they bring to the classroom through materials that reflect their identities and experiences, and creates a culture where their multilingualism is viewed as a strength and educators expect success.

- Forty percent of undocumented youth drop out of high school, compared to 8% of documented students. The disconnection rate among youth ages 16 to 24 who are noncitizens is 16% compared to 12% for youth with citizenship status.

- In 2021, legislation passed that allows undocumented students to pay the same tuition and fees as other Rhode Island residents at the state’s public higher education institutions.

- Barriers to work for immigrant youth and young adults include lack of work permits, visas, and other documentation, lack of exposure to different career paths, and lack of networking and professional communication skills, including limited English language proficiency and lack of knowledge about the professional terminology needed for applications and interviews. Targeted workforce development services including job coaching, job searching, mentorship, and peer navigation, alternative hiring models like paid work-based learning opportunities, and bridging professional gaps in networks and communication can help address these barriers.

Youth With Disabilities

- Opportunity youth are more than three times as likely to have a disability compared to their connected peers. Youth who have at least one disability have a disconnection rate of 27% compared to 11% for youth who do not have a disability.

- Despite improvements in high school graduation rates and postsecondary school enrollment, students with disabilities are still less likely to graduate from high school and more likely to be suspended than students without disabilities.

- In Rhode Island, the four-year graduation rate for the class of 2022 was 66% for students receiving special education services, compared to 87% for students not receiving these services. Some students enrolled in special education may take additional time to graduate. Of the 234 Rhode Island students who graduated in five years in 2021, 43% were students receiving special education services and 24% were Multilingual Learners. In 2019, Individuals with Disabilities Education Act (IDEA) eligibility was extended until a student’s 22nd birthday.

- Flexible course scheduling, targeted intervention, and enabling students to take greater control of their learning and career planning drive engagement and success among this group.

- Connecting to work among this population can be facilitated through the Office of Rehabilitative Services (ORS) including access to job coaching, mobile case management, peer navigation, connecting to services, and advocacy. Enacting policies that create safe work environments free of discrimination and ending subminimum wages for youth with disabilities can help opportunity youth contribute meaningfully to their community.
Pregnant and Parenting Youth

- Young women who are disconnected from school and work are four times more likely to become mothers than their connected peers. In fact, 36% of young mothers are not in school and are not working compared to 9.8% of young women who are not parenting.

- Pregnant and parenting students need a different array of resources to remain engaged and active in their education. They often require more than the standard four years to graduate from high school and college, although their grades are comparable to (and in many cases higher than) their non-pregnant and non-parenting peers, particularly at the college level.

- In order to succeed in college, this student population needs financial resources, on-campus child care and other affordable child care options as well as a campus culture that is supportive and not stigmatizing. Nationally, over the past 20 years, the number of on-campus child care centers has decreased by 25%. Peer-mentoring supports, family responsive attendance policies, and flexible course scheduling can add to a sense of belonging and well-being among pregnant and parenting students and support degree completion.

- The Supplemental Nutrition Assistance Program Employment and Training program (SNAP E&T) can reduce barriers to education by helping student parents who need to meet work requirements for food benefit eligibility.

- Adequate paid family leave, high-quality affordable child care, and family-friendly work polices such as flexible work from home hours would help support pregnant and parenting young adults in the workforce.

Youth and Young Adults Experiencing Homelessness

- One third (33%) of opportunity youth live in poverty. They are about five times as likely to struggle with living independently compared to connected youth. Not earning a high school diploma or GED is one of the most significant risk factors for homelessness among young adults.

- Homelessness often has a negative impact on education, employment, and health outcomes for youth and young adults. Homeless youth are more likely than their peers to be chronically absent, face disciplinary actions, be held back, and drop out of school. They are more vulnerable to pregnancy, substance use/misuse, mental health problems, bullying, and suicide than youth with stable housing.

- In 2022, 170 youth or young adults stayed at an emergency shelter, or transitional housing facility in Rhode Island, including three unaccompanied minors, 115 unaccompanied young adults ages 18-24, 30 parenting young adults, and 22 young adults who were sheltered with their parents.

- There are three primary causes of homelessness among youth and young adults -- family conflict, residential instability resulting from foster care and institutional placements, and economic problems. Engaging youth who have experienced homelessness in school and work goes beyond just meeting basic needs, but should also cultivate an environment of safety and stability where they are able to thrive. This begins with creating culturally responsive and affirming programs, permanent supportive housing, and information and coaching on what opportunities are best suited for individual youth.
During the COVID-19 pandemic, youth were navigating the transition to adulthood with record unemployment, housing instability, educational disruption, and mental health crises that continue to impact outcomes for youth. Youth were experiencing mental health challenges before the pandemic, but since the onset of the pandemic and the current aftermath, the number of youth experiencing mental health related issues has remained at an unprecedented level both nationally and in Rhode Island. This significantly impacts how youth engage in their classrooms. Students with the highest levels of chronic absence were also hardest hit by the COVID-19 pandemic. Nationally, college enrollments in 2021 declined as overall costs increased and more students decided not to continue on to postsecondary education.

Students miss school for a variety of reasons, including physical and mental health conditions, substance use/misuse, lack of access to health care, unstable housing, child welfare or juvenile justice involvement, work or family responsibilities, and lack of affordable and reliable transportation. Students may also stay away from school to avoid bullying, harassment or embarrassment associated with lack of clean/appropriate clothing, literacy issues, or other academic problems.

Partnering with students, families, and community partners can help schools re-engage chronically absent students and address lost learning opportunities.
Rhode Island requires school attendance until age 18. Rhode Island students over age 16 may obtain a waiver from the attendance requirement if they have an alternative learning plan for obtaining a diploma. Plans can include independent study, private instruction, community service, or online coursework and must be developed in consultation with the student, school counselor, school principal, and at least one parent or guardian. Alternative learning plans must be approved by the district superintendent.97

Programs and schools that enable students to acquire work-based skills and/or college credits while working toward their high school degrees can improve high school graduation rates and better prepare students for college completion and careers.90

Opportunities for young people to explore other pathways to completing high school diploma requirements in non-traditional settings that include education, hands-on job training, counseling, mentoring, leadership development, and apprenticeship opportunities that build credit toward degree completion increase engagement and have high completion rates.91,92,93

Multiple Pathways to Graduation

The Rhode Island four-year graduation rate for the Class of 2022 was 83%. The lowest rates were among Multilingual Learners, students receiving special education services, students in foster care, students experiencing homelessness, low-income students, and Hispanic and Native American students.94

Source: Rhode Island Department of Education, Class of 2022. Percentages may not sum to 100% due to rounding. Data for Asian students is not disaggregated by ethnic group. National research shows large academic disparities across Asian ethnic groups.

Adopting student-centered learning practices at the high school level encourages deeper engagement by personalizing learning, allowing students to take ownership over their work, and pacing learning to match the student's mastery of the content.95 High-quality postsecondary and workforce engagement opportunities can also increase high school graduation rates and college and career readiness.96 Among the Class of 2022, the four-year high school graduation rate for students enrolled in career and technical education (CTE) programs was 92%, compared to 80% for non-CTE concentrators.97
Between 2021 and 2031, jobs requiring a postsecondary degree or certificate are projected to grow faster than jobs requiring less education, yet only 37% of Rhode Island adults ages 25 and 64 have a bachelor's degree or higher.\textsuperscript{98,99}

Many students, especially low-income students, face barriers to college enrollment and success, such as insufficient academic preparation, difficulty navigating the applications and financial aid processes, and the high cost of college.\textsuperscript{100}

Completion of the Free Application for Federal Student Aid (FAFSA) is a key marker for both college enrollment and completion. Vulnerable student groups like youth experiencing homelessness and youth exiting foster care may have difficulty completing the FAFSA. Although the \textit{FAFSA Simplification Act} was enacted to remove these barriers, implementation has lagged at the federal level.\textsuperscript{101}

The Rhode Island Promise Scholarship made college more affordable and accessible to students by allowing students coming out of high school to attend CCRI for two years for free. More recently, legislation was passed to create a Rhode Island Hope Scholarship pilot program at Rhode Island College which provides a two-year scholarship covering tuition and fees for eligible juniors and seniors.\textsuperscript{102,103,104}

There continue to be large gaps in college access, particularly four-year college enrollment, between low- and higher-income students as well as by language status, disability, and race/ethnicity.\textsuperscript{105}

Fifty-eight percent of Rhode Island public high school graduates who enrolled in a two- or four-year college in 2015 earned a college diploma within six years.\textsuperscript{106}

In Rhode Island, there are large gaps in college completion between low-income and higher-income students, with 43% of low-income students completing college within six years, compared to 75% of higher-income students. There are also large disparities by race and ethnicity, language status, and disability.\textsuperscript{107}
Opportunity Youth and the Workforce

Unemployment

- Limited educational attainment is a barrier to sustained employment. Between 2017 and 2021 in Rhode Island, adults without a high school diploma were more than three times as likely to be unemployed as those with a bachelor’s degree.\textsuperscript{108}

- Between 2017 and 2021 in Rhode Island, 10.4% of adults without a high school diploma were unemployed compared to 6.5% of adults with a high school diploma and 3.1% with a bachelor’s degree or higher.\textsuperscript{109} During that same period, the median annual income for adults without a high school diploma was $30,340, compared to $38,638 for adults with a high school diploma and $60,216 for adults with a bachelor’s degree.\textsuperscript{110}

- In 2022, youth ages 16-24 had the highest unemployment rate across age groups at 8.9% compared to the overall unemployment rate of 3.5%. Young men between the ages of 16 to 24 are more likely to be unemployed (11.2%) than young women of the same age group (6.8%).\textsuperscript{111}

Workforce Development

- One of the most impactful ways for opportunity youth to engage with and contribute to their communities is by connecting to the workforce. Workforce development programs that outline career pathways that prepare youth for the job market beyond immediate lower wage positions not only improve their sense of self-security, self-sufficiency, and belonging, but also contribute to the growth of our economy.\textsuperscript{112}

- Early work experience during the teen years improves youth mental health, well-being, and school attendance and increases productivity, employability, and wages into adulthood.\textsuperscript{113} Summer work and internship programs may increase college aspirations and preparation for future employment.\textsuperscript{114} In 2017, Rhode Island launched PrepareRI, which aimed to close the gap between what youth learn in school and what they need to be prepared for higher-income job opportunities. The PrepareRI Internship Program provided paid summer internships for high school juniors and provided opportunities for more than 1,282 students across the state from 2017 to 2021.\textsuperscript{115}

- Expanding work-based learning opportunities can help more youth in Rhode Island successfully transition into college and careers. These types of programs can help to motivate students, teach them critical skills, connect them with mentors and positive adult role models, and help them to make informed decisions about their future. Many work-based learning programs allow youth to receive school credit and/or earn money while gaining important workplace experience. In Rhode Island, the Governor’s Workforce Board promotes work-based learning opportunities including internships, service-learning programs, school-based enterprise opportunities, industry projects, and apprenticeships.\textsuperscript{116}

- Apprenticeship programs are an effective program model for opportunity youth because they combine paid work with education as well as mentorship opportunities that allow youth to gain structured hands-on learning without having to choose between school or work. Apprenticeships also have structural benchmarks that include wage increases as new skills are developed and mastered that incentivize advancement.\textsuperscript{117,118}

- In 2023, Rhode Island passed the \textit{Apprenticeship Pathways to Earning a Bachelor’s Degree Act} which requires the University of Rhode Island, Rhode Island College, and the Community College of Rhode Island to create plans for “nontraditional pathways” to implement apprenticeship-for-credit programs beginning in the 2024 academic year.\textsuperscript{119}
Recommendations

- Provide access to high-quality, affordable early childhood education to prepare children for academic success and reduce disparities by income and race.
- Provide equitable access to high-quality K–12 education by ensuring that schools that serve low-income students and Students of Color have adequate funding and amend the Rhode Island Constitution so all Rhode Islanders must be provided with an education that is adequate and that this right is judicially enforceable.
- Expand access to safe, affordable, high-quality out-of-school time programs and recreational activities by creating a dedicated funding stream to support these programs.
- Establish attendance teams in all schools to monitor students’ attendance, identify barriers to attendance among individual students, and take action before they are considered chronically absent or truant.
- Strengthen early-warning systems to identify youth who are at-risk of not graduating and connect them to needed academic and social supports.
- Ensure implementation of the Trauma-Informed Schools Act which requires all administrators, teachers, and staff in every Rhode Island public school receive trauma-informed training that includes effective approaches for addressing student trauma and helping to create positive student-teacher relationships, improve students’ sense of belonging, build safe schools, and increase academic outcomes.
- Ensure that flexible learning experiences are available that allow young people to explore pathways to completing high school diploma requirements in non-traditional settings that include education, hands-on job training, counseling, mentoring, and leadership development, and apprenticeship opportunities that build credit toward degree completion.
- Increase access to youth development programs, such as mentoring programs, which help youth form relationships with supportive adults and contribute to their community.
- Provide equitable access to high-quality employment training opportunities, including internships, apprenticeships, and career and technical education programs.
- Offer job locating and training support for youth of working age (14+).
- Prioritize funding for early college and career readiness programs.
- Increase the supply of affordable housing to reduce housing insecurity, and amend the application process for young adults seeking housing without credit scores or work histories.
- Create a Tuition Waiver Program for current and former foster youth to remove the financial barrier to obtaining a postsecondary degree.
- Improve the financial aid process for homeless and foster care youth by supporting the enactment of the Higher Education for Homeless and Foster Youth Act (HEASHFY) and the Fostering Success in Higher Education Act (FSHE).
- Create a Homeless and Foster Student Liaison position at Rhode Island public higher education institutions to inform current and prospective students about financial aid and other assistance available to homeless youth and current and former foster youth.
- Support pregnant and parenting students by making on-campus child care and other affordable child care options available as well as creating a campus culture that is supportive and not stigmatizing for all parents, and especially lactating parents.
- Promote targeted workforce development services for Multilingual Learners and immigrant youth and young adults including job coaching, job searching, mentorship, and peer navigation.
- Provide transportation to and from education and work opportunities for opportunity youth who cite transportation as a barrier to continuing their programs.
Programs that offer work-based learning opportunities; provide meaningful, early, paid work experiences; and incorporate adult mentoring with youth development opportunities address the root causes of inequity and decrease the likelihood of youth disconnection.120,121 Here are some examples of such programs:

**College Unbound:** A Bachelor’s Degree program for returning adult learners who have faced significant barriers to attending college. They also operate a Prison Education Program designed to increase post-secondary graduation rates for incarcerated and formerly incarcerated adult learners.
- (401) 414-7536
- www.collegeunbound.edu/

**Comprehensive Community Action Program (CCAP):** CCAP’s Learn to Earn Employment, Training, and Education Programs provide youth and young adults ages 14 to 24 free education, work readiness/training, and job placement assistance as well as case management to help them reach their education and career goals.
- (401) 467-9610
- www.comcap.org/services/education-job-training/

**Mentor Rhode Island:** A network of 53 mentoring programs in 37 Rhode Island cities and towns that serves youth in school-, community-, and site-based mentoring programs, Mentor Rhode Island matches youth who may be displaced, seeking supportive adult relationships, or have been involved in the Juvenile Justice system with positive adult mentors.
- (401) 732-7700
- www.mentorri.org/

**Nowell Academy:** A charter school designed for overage and under-credited youth who are pregnant, parenting, or underserved to earn a high school diploma in a non-traditional setting and develop skills for postsecondary education and career success.
- (401) 751-0405
- www.nowellacademy.org/

**PrepareRI:** Creates a connected system for college and career readiness, with supports to reengage opportunity youth that get disconnected from the system including internship, career and technical, and apprenticeship opportunities.
- www.prepare-ri.org/

**Works Wonders®:** A nationally recognized and independently evaluated career readiness program operated by Foster Forward, Works Wonders® connects youth ages 14 to 26 who are currently, formerly, or are at-risk of involvement with foster care, juvenile justice or homelessness with skilled training, paid work opportunities, and career coaching.
- (401) 438-3900
- www.fosterforward.net/works-wonders

**Year Up:** Year Up offers youth and young adults ages 18 to 29 who have a high school diploma or GED and may experience barriers to accessing education and job opportunities an alternative to the traditional college-to-career pathway with hands-on skills-based job training.
- (401) 421-7819
- www.yearup.org/locations/ri-providence

**YouthBuild Preparatory Academy:** A workforce and career development program for youth ages 16 to 24 who may not have obtained a high school diploma that provides education, training, pre-apprenticeship certifications, and leadership development.
- (401) 273-7528
- www.youthbuildprov.org/

**Teen Focus:** Operated by Adoption Rhode Island and funded through DCYF, Teen Focus is a support program that assists youth and young adults with child welfare involvement make the transition to adulthood through connecting education pathways, life skills trainings, employment, and building a network post-care. (Referrals made by DCYF/ RI Family Court)
